EDITION #1

Values of FusionCast

REVOLUTIONARY

Stunning Bronze, Copper and Aluminum forced to the surface where you can appreciate it.

VERSATILE

Endless Possibilities. If you can imagine it, we can do it.

DURABLE

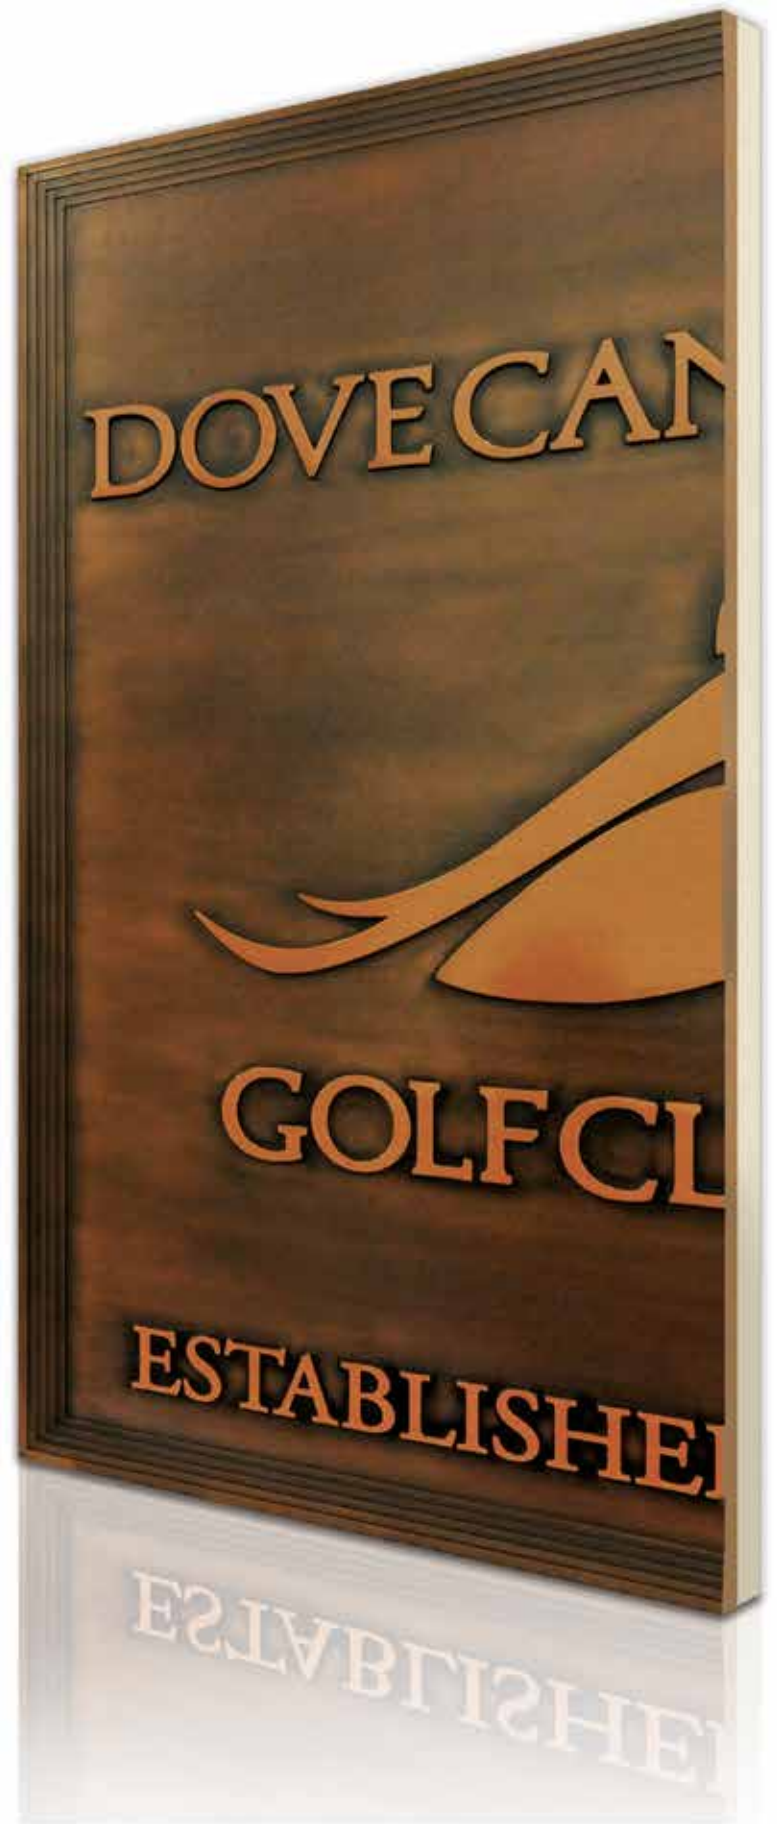

FusionCast uses a proprietary technology that fuses metal with high density urethane, the same stuff used in the space industry. The result is an elegant product with exceptional durability.

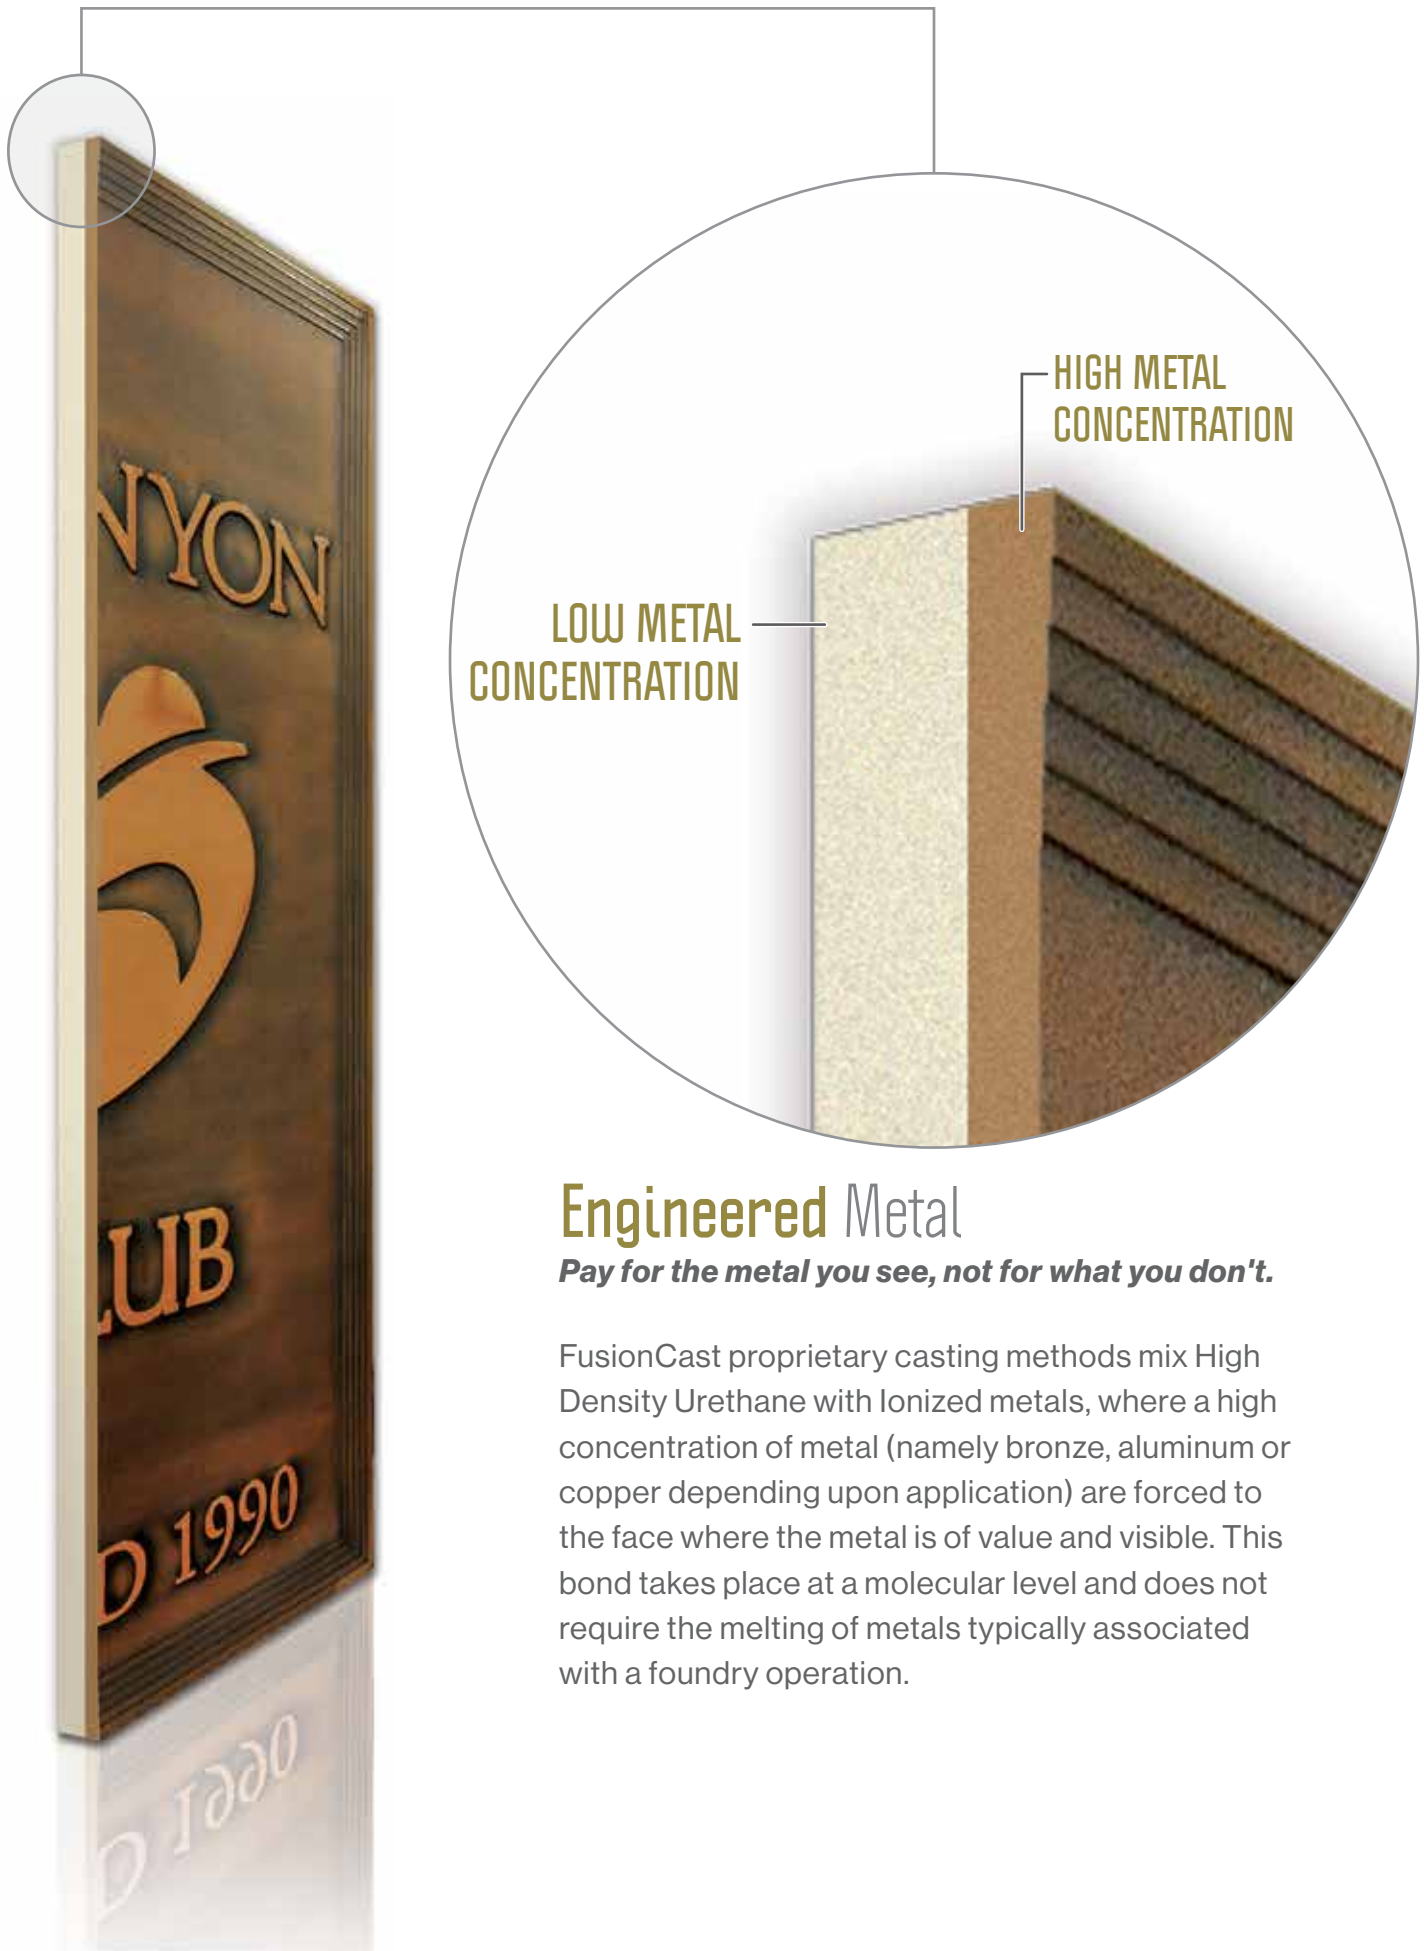

ECO-FRIENDLY

FusionCast cold casting process uses less metal, less energy, and eliminates virtually all toxic emissions into the air.

ECONOMICAL

Less metal translates into savings, without traditional pattern charges, a FusionCast sign can be 20-50% less expensive.

Engineered Metal

Pay for the metal you see, not for what you don't.

FusionCast proprietary casting methods mix High Density Urethane with Ionized metals, where a high concentration of metal (namely bronze, aluminum or copper depending upon application) are forced to the face where the metal is of value and visible. This bond takes place at a molecular level and does not require the melting of metals typically associated with a foundry operation.

Table Of Contents

1 TEE SIGNS / SPONSOR SIGNS

FusionCast can currently be found on over 70 of "SCOREGolf Top 100" facilities.

FAQ

How to do business with FusionCast:

FusionCast operates under a blended go-to-market approach to best serve the end user. We operate through authorized dealers (both National and Regional), local sales representatives in select territories, and through our in-house team of signage experts. No matter how you choose to deal with FusionCast, we look forward to working on your project with you.

Delivery/Production time:

Our standard production time is 15-20 business days from artwork approval and project deposit receipt. Since all of our products are custom made to order, non-standard shapes and styles or full facility signage orders with a significant number of pieces can take 30-40 business days.

Terms:

All FusionCast products from ideation to final product are made to order specifically for you. We require a 50% deposit with order approval, and 50% final payment prior to shipping (including delivery costs). Our team would be happy to provide progress pictures and status updates at your request so you can see how your order is progressing.

How will my order be delivered:

Through our expansive network of freight companies, FusionCast gets preferred shipping rates for both small and large scale shipments. FusionCast gathers multiple quotes on your behalf, and we pass on the savings to you, our valued customer. If you prefer to make your own shipping arrangements, please notify FusionCast when you confirm the production of the project. Detailed tracking info will be provided to you once your order ships.

Graphic approval disclaimer:

Based on customer direction, FusionCast will provide artwork for customer approval. If logos and brand images are required, high quality ai or eps files will be required. Customer is responsible to review and approve artwork. FusionCast assumes no responsibility for spelling or content errors once customer has approved artwork. First graphic approval is free of charge – all others are subject to additional cost pending complexity. Colour is directionally correct - may vary slightly as ink jet printer quality is not consistent with actual finished goods.

Warranty:

All FusionCast products come with a 10 year limited warranty when purchased through an authorized dealer. For warranty terms and conditions, please contact FusionCast for their written warranty policy.
